### UPDATE OF ANALYTICAL CAPACITY OF CSI INTERNATIONAL LABORATORY

This is in response to your letter Ref: CSIF22/2019/03 dated 14<sup>th</sup> June 2019 updating the Authority on the analytical capacity of CSI International Limited laboratory as per the NEMA Laboratory Designation Code of Practice.

Further on 14<sup>th</sup> June 2019 the Authority re-evaluated your analytical equipment portfolio and observed that you have acquired:

- one equipment for carrying out ambient air quality measurements; and
- One equipment for carrying out isokinetic stack particulate matter measurements.

The Authority recognizes your capacity to carry out the above air quality measurements and is in the process of reviewing the relevant annex of the Emission Licence Application Guidance Pack to reflect the same on the NEMA website; [www.nema.go.ke](http://www.nema.go.ke).

We appreciate your continued collaboration on the subject matter.
